

VIDEO STREAMING SERVICE

peakVU.TV™ is a high-quality and reliable video streaming solution

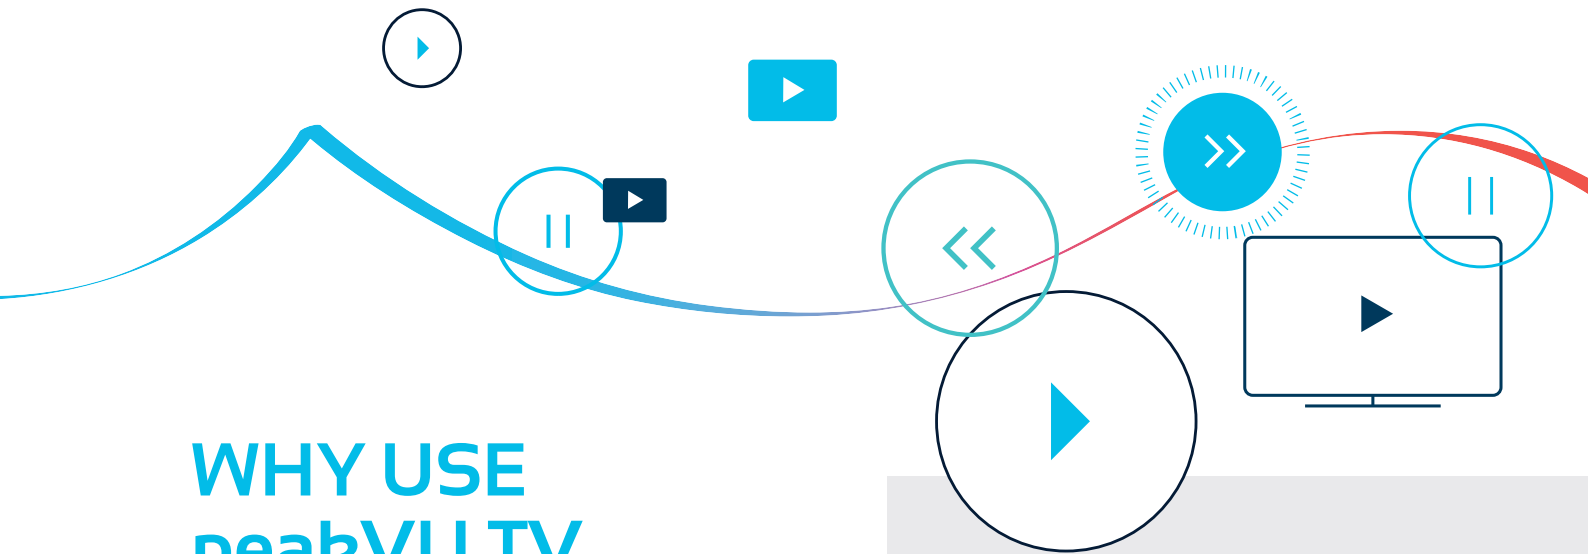

peakVU.TV™ enables you to very quickly launch a TV offer with all of the must-have features of a video streaming service including ultra-low-latency for live content, VOD, start-over TV, time-shift TV, catch-up TV, pause TV, lookback, and NDVR.

It's the most advanced video solution based on over 10 years of experience in IP and adaptive bitrate TV deployments.

Thanks to peakVU.TV, you can count on a 24/7 round-the-clock service. Supported by AI and our follow-the-sun NOC, the service is totally proactive with problems being identified before they occur!

This is streaming at its peak

WHY USE peakVU.TV

peakVU.TV enables you to easily deliver a multi-screen video experience to your subscribers.

■ SIMPLICITY

You can choose your UX service platform, DRM, app and dynamic ad insertion providers. The solution is hassle-free, meaning that your feeds' transport rights are cleared for the East and West coasts. The service is managed by our team thanks to our AI-assisted Network Operation Center (NOC) to provide you with dedicated customer support.

■ RELIABILITY

peakVU.TV offers a service availability with high security standard (like anti-DDOS, SSL, JWT, etc).

■ PROFITABILITY

Leverage our Dynamic Ad Insertion solution and customized features to increase revenue opportunities.

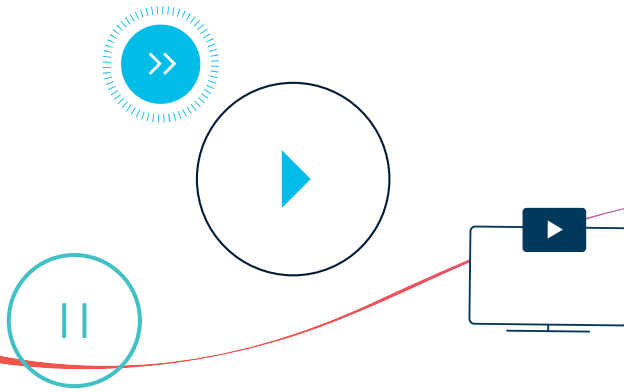

■ HIGH-QUALITY

peakVU.TV uses the best video CDN technologies on the market and enables a pristine picture quality to always delight your customers. Features like fast zapping and optimized bitrates ensure your video streaming service offers the best experience to your subscribers.

KEY BENEFITS

peakVU.TV delivers the most advanced video service on the market to delight your customers.
